

CHIN SHI ER

Phone number: +60124339920 email:
erchinqq06@gmail.com

Education :

University Malaya

1. Bachelor's in computer science (Software Engineering) -

Petronas Scholar: Oct 2025 – current

CGPA: 3.79

Experience

1. Technical and System Committee for UM Data Analytic Club (UMDAC)

Duration: Mar 2026 - Current

•Assisted in developing frontend of the official UMDAC website homepage, about us, sign in and sign-up pages using React, TailwindCSS and Next.js.

2. MyTech Career Fair Frontend Technical Committee

Duration: Mar 2026 - May 2026 (3 months)

Link: mytechfair.com

•Developed frontend website using React, TailwindCSS, Next.js with floorplan 3D model animation using blender and react three. Authentication using Google OAuth and maintaining data using Supabase.

•Collaborated with the event planning team to design some digital materials and stream layouts using Canva.

3. Technical Committee for IEEE Computer Society University Malaya Student Branch

Duration: January 2026-Current

•Responsible for managing the club's IT infrastructure, including the website, email systems, and any other digital tools the club uses.

- Oversee the club's technical operations during events, such as handling virtual platforms or maintaining equipment.
- Ensures data security and smooth functioning of digital resources.

4.Vice Head of Technical Department for UM Hackathon 2026

Duration: February 2026 - May 2026

Link: <https://umhackathon.org/>

- Supervised the end-to-end development of the event website, providing strategic feedback to enhance UI/UX features and overall functionality.
- Managed and scaled a Discord server supporting over 1,000 participants and 200+ teams, serving as the primary technical point of contact.
- Facilitated livestreamed technical workshops and broadcasted real-time event updates, ensuring high engagement and rapid resolution of student inquiries

5.YTL AI Labs SD Bhd AI Annotator (Part time, remote)

Duration: November 2025 - December 2025 , February 2026 - March 2026

- Evaluated and refined over 200 user prompts which involved single and multiturn-language to optimize Large Language Model (LLM) comprehension and ensure contextually accurate responses.
- Conducted rigorous data auditing to identify, label, and filter out unsafe, biased, or inappropriate content from AI-user chat histories.
- Collaborated on multilingual prompt tuning to ensure the AI model responded accurately in the appropriate target languages.
- Evaluate and select the best model translation from native Malay to Chinese model. Achieved an average pass rate over 80% for the accuracy performance

6.Technical Committee Member for Dean's Cup 2025 organised by Persatuan Komputer University Malaya (PEKOM)

Duration: October 2025 - December 2025

- Designed and deployed a responsive event website utilizing React, TypeScript, and TailwindCSS to deliver a seamless user experience.
- Architected a scalable backend database using Firebase to power a secure and efficient participant registration system.
- Configured and managed live-streaming architecture using OBS Studio and integrated technical equipment for high-quality live broadcasts.

7.Purple Cane Sdn Bhd Sales Assistant (Part-time)

Duration: June 2025 - July 2025

- Executed seasonal promotional campaigns, actively assisting customers with product selection and resolving inquiries.
- Managed retail operations including inventory monitoring, visual merchandising, and the maintenance of point-of-sale equipment.

Projects

1.Learning Resource Recommender:

Link: suluh-ai.vercel.app/

Tech Stack: Flutter, Python, FastApi, Hugging Face, Neon

Description:

This website is built to assist students (specifically for FSKTM students) to predict their future academic performance (fail and pass risk score) based on their study behaviour such as each subject GPA, gaming and study hours to provide related reading materials based on their subjects. Students can create their own flashcards, past-year paper questions and videos.

2.AI Chat Learning App with auto-generated summary and note-taking functionality:

Link: booklovian.vercel.app/

Tech Stack: React, Next.js, TailwindCss, Hugging Face, Supabase, Shadcn

Description:

A comprehensive SaaS educational dashboard that enables students to chat with voice AI assistant based on their chosen subject and topic with AI note-taking features.

3. Urban Flood & Water Quality Predictive Modelling (Kaggle Urban Flood Modelling Competition)

Language: Python (Numpy, Pandas)

Frameworks: PyTorch, PyTorch Geometric (PyG), XGBoost

Concepts: Random Forest, Graph Neural Networks (GNN, GCN), Time-Series Forecasting, LSTM, Physics-Informed Neural Networks (PINN), Autoregressive Modelling, Data Ensembling.

- Engineered complex 1D and 2D node features to simulate and analyze urban flood scenarios as part of a competitive Kaggle initiative.
- Designed and trained Random Forest machine learning model as the base model following with more complex models which involved **LSTM networks** (for temporal sequence memory) and **Graph Convolutional Networks (GCNs)** (for spatial message passing) to generate highly accurate water quality predictions.
- Model Ensembling : Engineered a conservative weighted ensemble (e.g., 0.7 GNN + 0.3 XGBoost) combining the deep structural intelligence of the ST-GNN with the high-variance stability of an XGBoost baseline. .

4. FlappyTron (Educational Arcade Quiz Game)

Link: <https://kashasnowaifu.itch.io/kastron>

Languages: C#

Tools: Unity Engine, Git, TextMeshPro, Unity Input System. **Concepts:** Game Loop Design, Dynamic Scaling, State Machines, 2D Physics.

- **Game Logic:** Developed core player mechanics including gravity-based movement, collision detection, and responsive input handling in C#.
- **State Management:** Designed a centralized Game Manager to oversee the lifecycle of a game session, from initialization and scoring to gameover states and scene reloading.
- **UI/UX Design:** Implemented a dynamic UI system using TextMeshPro for high-fidelity score tracking and interactive menus.
- **Version Control:** Managed project development and asset organization through Git, maintaining a clean repository structure for collaborative scalability.

Competitions

1.Awarded 2nd prize winner in Code Fest Closed Category Competitive Programming (PEKOM)

2.Bronze award in National E-Gamification UM Foundation Category (Leader) Organized by Universiti Sains Islam Malaysia

Communication

Mandarin: Very fluent in speaking and writing

English: Fluent in speaking and writing

Malay: Fluent in speaking and writing

Skills

- **Programming Languages:** TypeScript, JavaScript, C#, Python, HTML/CSS, Java, C++

- **Frontend & Mobile Frameworks:** React, React Native, Next.js, Flutter, TailwindCSS
- **Backend & Cloud:** Firebase, REST APIs, Hugging Face, Neon , Xano, Supabase
- **AI & Data Science:** Fundamental Machine Learning Concept, Data Annotation, Prompt Engineering
- **Tools & Platforms:** Unity, OBS Studio, Git/GitHub, Discord Community Management
